EDUCATION

Polytechnic University of the Philippines
Bachelor of Information and Technology (2022-2026)
Graduated Cum Laude | GWA: 1.49

EXPERIENCE

Full Stack Developer Intern | NexVision Innovations Inc. March 2026 – June 2026

(React, TypeScript, Node/Express, Supabase, GPS/IoT APIs)

- Built full-stack features across three client/internal platforms (LMS, fleet management, logistics ops), including a quiz engine with automated completion tracking and a course versioning system for live-published content.
- Engineered role-based, multi-step approval workflows connecting form submission, review, and downstream reporting for an active client's logistics system.
- Integrated hardware telemetry APIs for real-time equipment tracking and built preventive maintenance automation with configurable thresholds.

PROJECTS

ScanPass | QR Code-Based Attendance Tracking System
(React, React Native, Express, Supabase)

- Piloted with 38 students over 3 days, achieving a 98.5% scan success rate and reducing attendance recording to seconds, versus the 5–10 minutes per period reported under the manual process it replaced.
- Engineered RESTful Node.js/Express APIs with Supabase for data storage and auth, handling attendance events, automated daily/weekly/monthly reports, and role-based access control (admins vs. section-restricted teachers).
- Implemented automated notifications: email for temporary teacher credentials, SMS for real-time guardian alerts on student arrivals/departures.
- Presented at PLDT's MSME Day (Parañaque), pitching to startup founders and industry professionals.

TECHNOLOGIES

- Frontend: HTML, CSS/Tailwind CSS, JavaScript, TypeScript,React, React Native,
- Backend: Node.js , Express, Supabase, PostgreSQL, SQL,
- Tools & Platforms: Git, Github, Vercel, Render
